You can always find the latest version here: <https://www.bedag.ch/de/services/data-center-services/>

- ¹⁾ Customer tests are always requested after the maintenance windows. We will ask you by e-mail before the maintenance window to test your services operated by Bedag under realistic working conditions. Thank you for your understanding and your valuable cooperation.
- ²⁾ There is a strict change stop one working day before the maintenance window and one working day after the maintenance window. No orders are accepted or executed.
- ³⁾ Data center infrastructure maintenance: IT services remain available, please do not plan any changes. Applies mainly to our housing customers.
- ⁴⁾ Time changeover from summer to standard time. Interruption only for mainframe applications: (CICS, DB2, OpCon). No interruption for Windows, Linux and SAP systems.

Further Maintenance dates

- Open systems; Production: If required from 19:00 CET. (e.g. for the installation of urgent security patches)
- Open systems; testing/development: On demand every Tuesday evening from 17:00 CET.
